St. Charles offers comprehensive cancer services to Central Oregon. Its radiation oncology service in Bend, Oregon, is served by three linear accelerators. One of these machines is at end of life and needs to be replaced. St. Charles would like to locate the replacement linear accelerator in Redmond rather than Bend. To this end, St. Charles is proposing the construction of a new clinic in which the linear accelerator can be placed, and radiation oncology services can be provided. Since St. Charles is currently the only provider of radiation oncology services in the region, this proposed project will not expand the amount or type of radiation oncology services offered to patients. However, it will make radiation oncology services more accessible to patients living in the northern part of Central Oregon. It is proposed that the new radiation oncology clinic will be affiliated with St. Charles Redmond. All other cancer services will remain affiliated with St. Charles Bend

7. **In what ways may this project negatively impact the community that your facility serves? Include direct cost such as bonds as well as indirect impacts such as service interruptions. Attach additional pages if needed.**

None

8. **How has your facility evaluated the need for this project within the community that you serve?**

The project was reviewed and evaluated by the St. Charles System Portfolio Council, Finance Committee and the Board of Directors.

9. **Are the medical services created by this project already available in the community that your facility serves?**

Yes, comprehensive cancer treatment services are provided in Central Oregon by St. Charles Health System.
