

Under IRS regulations, St. Charles Health System and all charitable hospitals are required to identify which providers practicing within their facilities are covered under the organization’s financial assistance program.

Financial assistance awards will be applied to any balances you owe to St. Charles hospitals or employed providers (St. Charles Medical Group). Non-employed providers working within our facilities are not required to honor our financial assistance awards; however most providers offer their own discount programs for patients in financial need. Do not hesitate to ask non-St. Charles providers about their assistance or other discount programs.

The following is a list of our local, non-employed medical providers who have admitting privileges at St. Charles Health System hospitals and whether they honor our financial assistance awards:
