September 6, 2013

“Improving Outcomes in Pediatric Critical Care”

Mark T. Buchholz, MD Pediatric Intensive Care Unit, Emmanuel Children’s Hospital

Objectives: 1) Increase awareness of PICU outcomes and analyze the morbidity and/or mortality of cases presented. 2) Increase knowledge of treatment guidelines as appropriate to each case presented. 3) Identify conditions that may require remote pediatric critical care consultations. 4) Decrease the need for pediatric patients to be transferred.

September 13, 2013

“Infectious Disease: Nothing to Smile About”

Peter Milgrom, DDS, Professor of Dental Public Health Sciences and Pediatric Dentistry, University of Washington

Objectives: 1) Using evidenced-based research, describe the caries process as a communicable disease passed from primary caregiver to child. 2) Understand the need for initiating routine oral health care beginning at conception and the establishment of a dental home by age one. 3) Discuss the value of collaboration between medical and dental providers to promote optimal oral health throughout a patient’s lifetime. 4) Explain the medical management of caries in treating the dental infection instead of the restorative (i.e., drill and fill model). 5) Describe the role of the medical provider to increase preventive visits for pregnant women and children birth – 12 years, decrease emergency room visits for dental concern, and decrease unnecessary drug use.

September 20, 2013

“Over-diagnosis, Over-treatment, Over-medicalization of Life”

H. Gilbert Welch, MD, MPH, Professor, Dartmouth Institute for Health Policy and Clinical Practice & Geisel School of Medicine at Dartmouth

(Keynote from prior evening’s Pease Symposium)

Objectives: 1) Assist primary and specialty care providers in understanding the relevance of overdiagnosis; 2) Review the requisites of successful cancer screening; 3) Illustrate with screening mammography the adverse impact of overdiagnosis; 4) Recognize the benefits of breast cancer screening and impact on mortality reduction.
